EXPERIENCE

Parmagiat Solution Private Limited | Web Developer

May 2024 - Present

Audit software (1AUDIT.COM) | (Frontend and Backend)

- Implementing comprehensive add, edit, and delete options across diverse application sections.
- Integrating bidirectional drag-and-drop functionality using DnD Kit, allowing users to rearrange data in both rows and columns.
- Developing backend logic to manipulate data as needed for tasks like selecting working papers, calculating statistics, and retrieving dashboard information.

Grey Mirror Private Limited | Junior Web Developer

May 2023 - May 2024

Pear-to-Pear assets transaction System (Frontend)

- Developed the **search functionality** within the React Application, enabling users to search for specific order by order id or crypto currency name.
- **Created the History page** to showcase order successful history in a user-friendly format. Organized historical data by date. Implementing features such as infinite scrolling and Debouncing.
- Implemented the **login functionality**, incorporating security measures such as mnemonic generation for first-time user registration and PIN prompts for subsequent logins.
- Integrated the **React Apex Charts library** to visualize total balance data effectively within the application.
